## PACKAGING

**Large Box**  
Size - 650 x 450 x 400mm  
Weight - 1.108 Kg  
Material - FSC Mix 70%

**Medium Box**  
Size - 570 x 390 x 253mm  
Weight - 0.729 kg  
Material - FSC Mix 70%

**Small Box**  
Size - 381 x 254 x 356mm  
Weight - 0.464 kg  
Material - FSC Mix 70%

**Bag**  
Size - 450 x 525 x 45mm  
Weight - 0.02 Kg  
Material - LDPE

All boxes originate from Pakistan

**Divert from Earth and recycle your packaging.**

## KEEPING IN THE LOOP OPEN LOOP RECYCLING

Open loop recycling is where the recycled materials are converted into both new raw materials and waste product using a different application and often into a longer life product.

Example: recycling HDPE bottles to make plastic pipes with a long lifespan keeping the recycled material in functional use.

The post consumer recycled material we use is processed in China and then shipped to Pakistan where it is then used to manufacture our ECOROKWEAR garments.

We are extending the lifespan of post consumer bottles by processing them into recycled materials for the garments.

"SMI is excited to have a very clear roadmap for our climate-neutral journey/goals, but it doesn't stop there! We're facing up to the future, doing more with our products, suppliers, customers and our impact on the environment."

**Elizabeth Mellor, Environmental Social Governance Manager**

### Code of conduct

SMI understands the value of operating to the highest ethical standards and the importance of developing strong relationships with suppliers who share our values for continual improvement towards the environment and the wider community. SMI's Supplier Code of Conduct and Code of Ethics sets out our requirements to ensure that workplace rights of all workers in our supply chain are respected and afforded, and that all workers have good working conditions.
